

Great camas*Scientific:* Camassia leichtlinii*Primary category:* Ground cover, flower*Habitat:* Wetlands*Description (by Bosky Dell Natives):*

Bulbous perennial (2-3ft.) with long, narrow leaves and gorgeous creamy white to blue flowers in spring. Camas generally grows in the deep, moist soil of grassy meadows and slopes, but requires a less water after blooming.

Sun, winter wet (allow the bulbs to dry out after flowering), heavy soil ok.
